CONCEPT

The idea is to simplify the form, so the user is not overwhelmed with options. By separating the form into two columns, we avoid the "mile-long" node form Drupal is famous form. By hiding form descriptions and showing them in a tool-tip only when a user hovers over the form item, we make the form a lot simpler and cleaner.

NOTES

	Type	Element	Description
1	Form item	**WYIWYG editor**	We will be using the CKeditor WYIWYG editor with a simplified toolbar.
2	Form item	**Form desciptions**	All form descriptions will be displayed on a tool-tip when the user hovers over the form item.
3	Form item	**Checkbox**	One of the categories will be selected by default.
4	Form item	**Text box**	The country field will have UK selected as default.
